COURSE CONTENT

Student Learning Outcomes:

Upon completion of the course, students will be able to:

1. Describe the proper construction sequencing and order of operations for a typical building project.
2. Analyze the interdependencies of different construction sequences and processes.
3. Explain the connection and relationship of office project management to field project management.
4. Identify proper jobsite etiquette, professional demeanor, communication protocols, and best-work practices as related to field construction.

Objectives:

In order to achieve these learning outcomes, during the course students will:

1. Observe and evaluate current project construction processes, sequencing, and material use at local area jobsites.
2. Use plan-reading skills to understand project implementation and execution during the duration of a project.
3. Maintain a journal for field report entries of visited construction sites.
4. Utilize computer-based applications appropriate to facilitate field construction processes.

Topics and Scope:

- I. Field Construction Practice and Technologies Overview
 - A. Construction management site facilities
 - B. Work crews and other site visitors
 - C. Material staging and storage
 - D. Equipment and vehicles
 - E. Tools and supplies storage
 - F. Restroom facilities
 - G. Jobsite security and access
 - H. Safety issues
- II. Basic Site Building Layout and Surveying Techniques
 - A. Site plans
 - B. Property line determinations
 - C. Staking-out and marking building and other site components
- III. Layout and Installation: Grading and Utilities
 - A. Points of connection to infrastructure systems: water, electricity, storm water, sewage, data/telecommunication, and gas
 - B. Trenches for utilities
 - C. Overhead utilities
 - D. Temporary utilities
- IV. Use of Basic Hand and Power Tool Technologies Review
- V. Foundation and Slab-On-Grade Construction
 - A. Concrete formwork
 - B. Reinforcing bars and welded-wire fabric in concrete construction
 - C. Slab-on-grade construction and sub-slab components: drainage, gravel, vapor barriers, and sand
 - D. Foundation types: spread footing, isolated footings, pier and grade beam, pile and pier cap, post-tensioned raft slabs
 - E. Construction and control joints in concrete
 - F. Concrete embedments
- VI. Wood and Light Gauge Steel Framing
 - A. Dimensional lumber sizes and species
 - B. Cold-formed steel framing member sizes
 - C. Typical framing layout for floors, walls, stairs, ceilings, and roofs
- VII. Mechanical, Electrical and Plumbing (MEP)
 - A. Rough-in MEP: backflow preventors, fire suppression systems, piping, fittings, conduits, conductors, wiring, junction boxes, weatherhead, meters, electrical distribution panels, etc.
 - B. Finish MEP: equipment, fixtures, faucets, switches, face plates, diffusers, grilles, thermostats, switches, controls, etc.
- VIII. Roofing
 - A. Fiberglass composition roofing systems
 - B. Emulsion-applied roofing systems
 - C. Single-ply mechanical membrane systems
 - D. Metal roofing systems
- IX. Exterior Envelope Elements
 - A. Windows and doors
 - B. Flashing, counterflashing, reglets, drip edges, weep screeds, expansion joints, and copings
 - C. Vapor barriers
 - D. Exterior finishes: metal, wood, plaster, masonry, and veneer
 - E. Sealants and coatings
 - F. Thermal insulation: Fiberglass batt, cellulose, foam-in-place, and rigid insulation systems
 - G. Exterior finish trim work
 - H. Gutters, rain water leaders, downspouts, diverters, scuppers, and collection boxes

X. Interior Finish

A. Floors

1. Wood finish flooring and installation
2. Sheet products and installation
3. Tile products and installation
4. Emulsion applied products
5. Sealants

B. Walls

1. Gypsum wallboard products and installation
2. Glass mortar units
3. Fiberglass reinforced panels (FRP)
4. Wood finishes

C. Ceilings

1. Gypsum board products and installation
2. Suspended panel systems
3. Wood ceilings

D. Casework

1. Cabinetry and countertops
2. Window and door casework and trim
3. Baseboards, moldings, and other interior trim

XI. Inspections and Observations

A. Building department inspections

B. Special inspections

C. Architectural and structural observations and field reports

XII. Trades and Scope of Work Coordination

Assignment:

1. Reading assignments (10-20 pages per week)
2. Study question sets (1-3 weekly)
3. Field Reports (6-12)
4. Quizzes (1-4)
5. Midterm exam
6. Final exam

Methods of Evaluation/Basis of Grade:

Writing: Assessment tools that demonstrate writing skills and/or require students to select, organize and explain ideas in writing.

Field reports

Writing
10 - 20%

Problem Solving: Assessment tools, other than exams, that demonstrate competence in computational or non-computational problem solving skills.

Study question sets

Problem solving
20 - 50%

Skill Demonstrations: All skill-based and physical demonstrations used for assessment purposes including skill performance exams.

None

Skill Demonstrations
0 - 0%

Exams: All forms of formal testing, other than skill performance exams.

Quizzes and exams

Exams
30 - 50%

Other: Includes any assessment tools that do not logically fit into the above categories.

Class participation

Other Category
5 - 10%

Representative Textbooks and Materials:

Instructor prepared materials
