

# Your Path to Recession Proof Jobs at SRJC

## RENRG 101: Renewable Energy Careers (2 units)

Build your career plan and network in one of the nation's fastest growing and highest demanded industries: solar photovoltaics! Learn about endless opportunities (even during recessions!) in solar and other renewable energy industries such as geothermal and wind.

About SRJC's Renewable Energy Program: In addition to this course, students will be trained by industry experts on the basics of solar PV (7 units), panel installation (12 units), and grid tied systems design and sales (12 units). Start your pathway into this exciting industry and career!
