

MECHATRONICS OPEN HOUSE

Come and see our newly updated Maker Space!
Talk to us about what Mechatronics can mean
for your future.

Date: October 12, 2018

Time: 4pm - 7pm

Place: Bussman Hall Room 1447

Light refreshments will be served.

What is Mechatronics?

Mechatronics combines mechanics, electronics & computer technologies to create “smart” products. Mechatronics technicians help design, install, maintain and repair industrial equipment & a wide array of appliances used in business.

Mechatronics has been identified as a new and emerging growth area and an in-demand industry cluster.
